1963 CENSUS OF BUSINESS

Findings of the 1963 Census of Business are available in individual paperbound reports for specific areas and subjects. Separate report series cover businesses engaged in retail trade, wholesale trade, and selected service activities in the United States, Guam, and the Virgin Islands of the United States. The report for Puerto Rico covers all three segments of the census—retail, wholesale and service activities. Individual reports have been assembled and reissued in clothbindings especially designed for long-term reference use. All reports are sold by the Government Printing Office.

Announcement-order forms are available from the Bureau of the Census free of charge (use request form) for the following report series:

AREA REPORTS

Three series presenting separate paperbound reports for each State, District of Columbia, and the United States on retail, wholesale, and selected service trades.

SUBJECT REPORTS

Three series presenting five paperbound reports on retail trade, seven on wholesale, and seven on selected service trades.

MERCHANDISE LINE SALES

Ten paperbound reports on retail sales by merchandise lines.

MAJOR RETAIL CENTERS

Separate paperbound reports for 116 standard metropolitan statistical areas and a U.S. Summary.

1963 CENSUS OF BUSINESS (VOLS. I–VII)

Clothbound edition of data issued previously in separate paperbound reports.

1963 ECONOMIC CENSUSES OF PUERTO RICO

Reports of the 1963 Census of Business and the 1963 Census of Manufactures.

REQUEST FORM

SPECIAL ANNOUNCEMENT

NEW SCHEDULE A CLASSIFICATION ESTABLISHED

Effective with the March 1967 statistics, Schedule A number 732.9190 was established to cover importations of Motorcycles, Other Than Piston Type—NO. Data for March represents the initial importation of this type of motorcycle.

GENERAL EXPLANATION

COVERAGE

The import statistics reflect both government and nongovernment imports of merchandise from foreign countries into the U.S. customs area (includes the 50 States, the District of Columbia, and Puerto Rico), whether or not the importation involves a commercial transaction. In general, the statistics record the physical movement of merchandise into the United States from foreign countries, with the exception of the following types of transactions which are excluded from the statistics:

1. Merchandise shipped in transit through the United States, when documented with customs as an in-transit movement. (Foreign merchandise moving in transit through the United States which is released from customs' custody is documented as an importation and included in the import statistics. Its exportation from the United States is reported in the export statistics.)

2. Shipments between the United States and Puerto Rico, between the United States and its possessions (including the Virgin Islands), between any of these outlying areas, and imports into U.S. possessions from foreign countries. (Imports into Puerto Rico from foreign countries are included in the U.S. import statistics.)

3. U.S. merchandise returned by U.S. military forces for their own use.

4. Gold and silver imported in the form of ore, bullion, coins, etc.

5. Some other transactions not considered imports for statistical purposes or of relatively small significance in terms of total value or statistical importance, such as personal and household effects of travelers, temporary imports, low-valued nondutiable imports by mail, etc.

Types of Imports

Imported merchandise is reported as "general imports" and "imports for consumption". General imports are the total of entries for immediate consumption and entries into bonded customs warehouses. They reflect the total arrivals of merchandise (except for in-transit shipments), whether such merchandise enters consumption channels immediately or is entered into warehouses under customs custody to be subsequently withdrawn for consumption or withdrawn for exportation. The general import statistics, therefore, reflect the total of merchandise entered for immediate consumption ("duty free" merchandise, merchandise on which duty is paid on arrival, and merchandise entered into bonded customs manufacturing warehouses for processing and subsequent export of the main product) plus merchandise entered into bonded customs storage warehouses and entered into bonded customs smelting and refining warehouses.

Imports for consumption are total entries for immediate consumption and withdrawals from warehouses for consumption, and therefore reflect the total of commodities entered into U.S. consumption channels. Imports for consumption statistics include merchandise entered for immediate consumption (as parenthetically explained above) plus merchandise withdrawn from bonded storage warehouses for consumption, merchandise withdrawn from bonded smelting and refining warehouses, and merchandise transferred from bonded storage warehouses to bonded manufacturing warehouses for manufacturing and export.

Monthly Coverage

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the import statistics for the month of import, which is based on the filing date of the import entry (immediate consumption or warehouse entry) or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the actual month of importation to a subsequent month, usually the succeeding month.

Except for the month when a change in the carryover is introduced, carryover should have little effect on month-to-month comparisons of overall import totals, since the carryover of the previous month should compensate roughly for that of the following month. For smaller segments—commodity, country, and commodity by country totals—there is also some compensation on a month-to-month basis, but comparisons should be made with the awareness that figures for a given month may represent more or less than the amounts shipped during the month, especially where the volume of trade is not large. For cumulative data, the problem of monthly carryover is somewhat minimized.

SOURCE OF INFORMATION

The source of information on imports of merchandise is the import entry and warehouse withdrawal forms which importers are required to file with customs officials. Statistical factors of country of origin, net quantity, value, and commodity classification are verified by customs officials on formal consumption and warehouse entries filed for transactions valued over $250, which are ordinarily subject to examination for customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals which account for approximately 6 percent of the total value of imports for consumption, while not subject to the verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] *For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).*

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended.

COMMODITY INFORMATION

The basic import data are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA). In this report the TSUSA data are presented in terms of a rearranged commodity classification system—Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).[2] Schedule A was constructed by the Bureau of the Census first, to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,200 commodity groupings that are meaningful in terms of commodities important in the U.S. import trade and second, to provide data in terms of the SITC outline that are comparable, insofar as comparison is possible, to the foreign trade statistics compiled by other trading nations.

At the 1-, 2-, and 3-digit levels, the numbering system of Schedule A is identical with that of the SITC. The commodity coverage is not always identical, but it is believed that for most statistical purposes the coverage at the 1-, 2-, and 3-digit levels can be considered essentially comparable with that of the SITC. At the 4-digit level, the retention of an SITC number in Schedule A indicates similarity of coverage, but the degree of comparability may in some cases be somewhat less at the 4-digit level for identical numbers in the two systems than at the 1-, 2-, and 3-digit levels. When a non-SITC number is used as the fourth digit of a Schedule A number, comparability of coverage with any given SITC classification at that level should not be expected, and there will be comparability only with combinations of SITC classifications.

AVAILABILITY OF TSUSA DATA

Information in terms of the 7-digit TSUSA classifications, under which the import statistics are initially compiled, is not presented as such in this report. (A few Scheduie A classifications represent individual TSUSA classifications.) However, import data for individual TSUSA numbers are presented in various arrangements in unpublished monthly reports, identified as IM 136, IM 145, IM 146, and IM 154. Copies of these reports are available for reference use at principal Department of Commerce Field Offices and at the following locations:

New York Office, Foreign Trade Branch,
Processing Division
Bureau of the Census, Room 434, Customhouse
New York, New York, 10004
(Located at Bowling Green)

Trade Information Section
Foreign Trade Division, Bureau of the Census
Room 2555, Federal Office Building #3
Washington, D.C., 20233
(Located at Suitland, Maryland)

Statistical Reference Room
International Trade Analysis Division
Bureau of International Commerce
Room 3040, Commerce Building
Washington, D.C., 20230

Data for the TSUSA classifications are also available on a subscription basis in various forms, such as special reports prepared from the unpublished reports, photocopies, microfilm, or photocopies of microfilm output. Further information regarding the availability of this special service may be obtained from the Bureau of the Census.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

Countries are presented in the order of Schedule C, Classification of Country Designations Used in Compiling the U.S. Foreign Trade Statistics. Country names that are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

The country designation UNIDENT is used to reflect imports from countries which could not be identified because of illegible reporting on informal entries (shipments valued under $251). The designation OTH CTY represents the total for countries from which imports of the particular commodity averaged less than $1,000 per month based on cumulative general import figures for January-to-date.

ESTIMATED DATA FOR LOW-VALUED IMPORTS

Effective with the statistics for January 1967, data on imports valued under $251 reported on both formal documents and informal entries (informal entries generally contain items valued not more than $250) are estimated from a 5-percent sample, a change from the 1-percent sample previously in effect. The estimates for shipments valued under $251 are shown under commodity codes 9900000, 990.0, 990, and 99 and are included in the section 9 total and the total for U.S. imports. They are excluded from the other 2-, 3-, 4- and 7-digit commodity codes. (The estimates for low-valued shipments do not reflect any imports by mail of duty-free merchandise valued under $251, for which import entries are not required to be filed.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. The total value so excluded generally amounts to about 1 percent of the monthly

[2] *U.N. Statistical Papers, Series M, No. 34, 1961.*

import total. Although subject to considerable variability,[3] particularly when the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect that the exclusion of the items has on the commodity data for individual countries.

The extent to which the estimates shown under commodity code 9900000 might not agree with a complete tabulation of the shipments depends upon the number of items that fall in the sample. In table 2, which contains 7-digit commodity by country data, the number of items in the sample is shown by country under commodity code 9900000 in the net quantity columns. The number in sample can be used in conjunction with the following table to obtain an approximate estimate of the sampling variability on a 2-times-out-of-3 basis.

The table below indicates the degree of reliability to be attached to a specified value:

If the number of items indicated from the sample is—	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between—	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	2,500
1	2,000	5,800
2	2,900	6,900
3	3,800	7,700
4	4,500	8,100
5	5,100	8,700
6	5,600	9,300
7	6,200	9,800
8	6,800	10,200
9	7,300	10,600
10	7,700	11,000
11-14	8,600	11,700
15-19	9,700	12,700
20-29	11,400	14,300
30-39	13,300	16,000
40-59	16,000	18,700
60-79	19,200	22,000
80-99	22,100	24,700
100-124	24,800	27,300
125-149	27,700	30,100
150-174	30,200	32,800
175-199	32,600	35,000
200-249	36,000	37,800
250-299	39,400	42,100
300-399	44,700	47,300
400-499	51,300	54,100
500-599	57,300	60,100
600-699[2]	62,400	65,000

[1] The actual value of shipments cannot be less than 1/20 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/20 of the estimate.

[2] If the number of items in the sample is greater than 699, sampling variability for the estimates of the low-valued shipments will generally be less than 7 percent.

[3] *The estimated totals for low-valued imports reported under commodity number 9900000 is subject to a sampling variability of about 1 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 1 percent. The estimates by country under commodity number 9900000 are subject to greater sampling variability--around 10 percent for countries with about 300 low-valued shipments in the sample; around 20 percent for countries with about 100 shipments in the samples; and over 20 percent for smaller sample sizes.*

The following will illustrate the use of the table:

Suppose an estimated value of $72,500 is based on 55 items in the sample. Referring to the line 40-59, one notes the values $16,000 and $18,700. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $56,500 ($72,500 reduced by $16,000) and $91,200 ($72,500 increased by $18,700).

Should a user desire to combine two or more figures that are estimated values or include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

REVISIONS TO IMPORT STATISTICS

In general, the cumulative data in the reports for February through November represent the summarization of unrevised monthly statistics. Revisions to the monthly statistics for the current year are published in the December issue and these revisions are reflected in the cumulative data in that issue. If unusual circumstances require that an error be corrected prior to the regular time for carrying corrections into the statistics, an announcement is made and the correction is incorporated in the cumulative data at that time.

SOURCES OF FURTHER INFORMATION ABOUT FOREIGN TRADE STATISTICS

Summary import statistics are published in Report FT 900-1, Total Import Trade (the initial release of import data each month) and Report FT 990, Highlights of U.S. Export and Import Trade. Additional import statistics are published in Report FT 150, U.S. General Imports, Schedule A Commodity Groupings, Geographic Area, Country, and Method of Transportation, and Report FT 155, U.S. General Imports, Geographic Area, Country, Schedule A Commodity Groupings, and Method of Transportation. These reports contain statistics for the current month and cumulative data for January to date. Further information regarding the foreign trade statistics program for 1967 is furnished in the Guide to Foreign Trade Statistics: 1967, copies of which may be obtained free of charge from the Bureau of the Census. The Guide contains an explanation of the coverage of the statistics and provides sample illustrations of the content and general arrangement of the data presented in individual foreign trade reports and tabulations.

A discussion of the compilation procedures and coverage of the statistics also appears in the foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) are included as special announcements in current issues of the statistical publications. Copies of such announcements are also attached to reference copies of tabulations where appropriate. Reports providing additional detail compiled but not published can be obtained on a cost basis. For further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

Abbreviation	Description	Abbreviation	Description
AOZ	Avoirdupois ounce	LFT	Linear foot
BBL	Barrel	LTN	Long ton (2,240 pounds)
BU	Bushel	M	Thousand (1,000)
C	One hundred	MBF	M (1,000) board feet
CAR	Carat	MC	Millicurie
CD	Cord	MLF	M (1,000) linear feet
CFT	Cubic foot	MSF	M (1,000) square feet
CLB	Content pound	NO	Number
CTN	Content ton	PC	Piece
CWT	Hundredweight (100 pounds)	PFG	Proof gallon
DOZ	Dozen	PR	Pair
DPC	Dozen pieces	SFT	Square foot
DPR	Dozen pair	SQ	Squares
GAL	Gallon	STN	Short ton (2,000 lb.)
GLB	Gross pound	SUF	Superficial foot
GR	Gross	SYD	Square yard
GRM	Gram	TOZ	Troy ounce
LB	Pound	YD	Yard

Table 1. Value of Schedule A Groupings of Commodities

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments valued at less than $251 are shown only under Schedule A subgroup 990.0 and excluded from all other subgroups)
